5 次のアナ (Anna) と メアリー (Mary) の会話を読んで、各問いに答えなさい。

Anna : Hi, Mary! I went to the mall earlier, and I saw that some of our favorite movies are playing.

Mary : Really, Anna?

Anna : They are showing *The Supers*, *Kamala and Donald*, *Love Star*, and *Planet Wilcox*. I think *Planet Wilcox* is the best movie among those four.

Mary : I would rather see *Love Star* than *Planet Wilcox*, although I think *The Supers* has the best story line. I think it's because the story is about normal people being super heroes. To tell the truth, I also want to be a super hero and you wouldn't know it!

Anna : Yeah, sure. Super Mary!  Anyway, I haven't seen *The Supers* yet. How about going to a movie later this afternoon? Let's choose between *The Supers* or *Planet Wilcox*.

Mary : Why don't we also add *Love Star* to that list?

Anna : Then, let's go to see *Love Star*.  It starts at one p.m.

Mary : Let's meet at 12:00 p.m. Let's have lunch first, before we go to the theater, unless you just want to eat popcorn!

問1 文中の空所  ~  に入る最も適切なものを、ア～オから1つずつ選び、記号で答えなさい。

6 以下の英文は「自分にとって効率の良い勉強方法とは何か」について各国の高校生に話を聞いた文章である。英文を読んで各問いに答えなさい。

Students everywhere wonder how they can study less and learn more. Luckily, thanks to the study of brain science, it is possible for everyone to be a ( 1 ) successful student. Here are study \*tips from four successful students.

#### MIO YAMAGUCHI from JAPAN

I found it's really helpful to study for short periods of time and then take a break. If I try to study for a long time, my brain doesn't have a chance to rest. But if I work for ( 2 ) 45 minutes and then stop for a short time, I actually become more \*productive.

Here's a good way to remember new information. Instead of trying to remember something new by just studying it once, I return to it a few different times and repeat it. So if I am trying to learn new words, first I try to remember them right after I learn them. That way my brain can access the new information. Then I try to remember them again the next day. And then again the day after that. By putting some space in between, I can assist my brain to remember the ( 3 ) words.

#### GEORGE JONES from ENGLAND

Believe it or not, the best advice that I got to increase my brain power actually comes from my mother! She always told me to be sure to get enough sleep at night. I found that my mom was right! Scientists say getting enough sleep is important to help your brain work at a high level. During the day, your brain gets filled with information. At night, when you sleep, your brain continues to take care of that information. Scientists found that (a) to learn / healthy sleep / can increase / people's ability / enough ]. But when people don't get enough sleep, they don't learn as well.

OK, here's another tip from my mom: it's important to ( 4 ) enough exercise. When you exercise, you increase the movement of blood all through your body. This includes your brain. When your brain receives more blood, it can grow new \*internal pathways to help you think ( 5 ). Thanks, Mom! I'm going to go and work out now.

#### ALEX LEE from CANADA

The key for me is to take notes in class. Writing something down helps me remember, and I need to understand something in ( 6 ) to write it down. There is something about the \*physical act of writing that helps us remember the ideas better. When I first tried to take notes, I felt stressed out. But I kept trying, and eventually my listening and understanding skills got better. So that has worked really well for me. Also, I heard that researchers said that if you are taking notes in class, it is better to use a pen and paper rather than \*a laptop. In experiments, when students took notes by hand, they listened more actively and were better able to understand important ideas.

#### EDDIE TYLER from USA

My secret to success is to give my brain some variety. If I try to learn everything the same way every time, my brain won't find it interesting. So instead of always studying the same ( 7 ), I introduce some variety into my study habits. So if I usually study in my bedroom, I try studying in the kitchen for a change. Instead of studying only in the evening, I try studying during the afternoon. My brain responds well to things ( 8 ) are new.

Another thing that helps me is to try to teach another student. When I take the time to study and then explain ideas to another person, it really helps me understand the subject and arrange my ideas. When I am able to successfully teach another person, it helps me remember and process the information, too.

Try out some of these ideas. You may find that

\*tips 秘訣

\*productive 効率性が上がる

\* internal pathways 脳内で情報を伝える経路

\* physical act of writing 書くという動作

\* a laptop ノートパソコン
